

COMMONWEALTH NEW BUILDING PROJECT

UPDATE

TEMPORARY TRAFFIC CHANGE COMMENCING 27 AUGUST 2009

Temporary traffic management plans are being implemented to ensure the safe delivery of this project and to minimise its impact on the residents of Campbell and local road users.

Over the next six months heavy vehicles will be engaged in earthworks on the construction site, throughout the day from Monday to Saturday.

The vehicles will be using access points from Russell Drive and Constitution Avenue and heavy vehicle traffic will be diverted away from the streets of Campbell.

The routes to be followed by the heavy vehicles are marked as dashes on the picture below.

A 40 km per hour speed zone will be introduced on Russell Drive, from the entry to the Defence car park through to the Constitution Avenue intersection.

A Keep Clear zone will be installed at the main site entry point, just south of the Russell Drive/Constitution Avenue intersection. Traffic control staff will monitor traffic flow.

Temporary signage will be erected to inform road users of the changed traffic conditions.
